PROFESSIONAL SUMMARY

Level 7 certified Data Analyst with 3+ years' experience in data analytics and enterprise consulting. Achieved 90%+ invoice reconciliation accuracy at HighRadius, cutting manual labour by 40%, **improved B2B segmentation strategy for British Telecom** and **redesigned Emirates Group loyalty programme for Gen Z**.

CORE SKILLS

Functional Competencies: Stakeholder Management, Cross-functional Collaboration, Client Retention, Business Case Development, Business Process Mapping, UAT & Client Workshops, ERP Solution Implementation, Dashboard Design & Reporting
Technical Competencies:

- **Data Analytics:** Machine Learning, Statistical Modelling, Clustering & Segmentation, A/B Testing, Data Validation, Cloud
- **Tools:** Python, R, SQL, Power BI, Tableau, Excel

WORK EXPERIENCE

Segmentation Analyst (Dissertation Project), British Telecom Jun 2026 - Aug 2026

- **Steered BT Business's segmentation approach beyond firmographics to customer needs**, behaviours and decision drivers, analysing a large-scale B2B survey dataset into 4 usable segments, resulting in improved targeting accuracy.
- **Engineered and validated 4 segmentation models using clustering and dimensionality-reduction techniques in R**, translating segments into actionable recommendations for marketing, sales and product.

Functional Consultant, HighRadius Corporation Jan 2025 - Jul 2025

- Led Cash Application implementations integrating invoice auto-matching with client SAP and Oracle ERPs, **achieving 90%+ auto-match accuracy and cutting manual labour by 40%**.
- Maintained and updated backend product changes using SQL, **supporting performance monitoring, data validation and reconciliation-error tracking to lift processing efficiency by 30%**.

Associate Consultant, HighRadius Corporation Jan 2024 - Jan 2025

- **Collaborated with client and internal teams on 20+ enterprise accounts**, turning process gaps into roadmaps and cutting AR cycles by 20%.
- **Designed and delivered post-implementation performance dashboards in Power BI**, giving finance teams real-time visibility into key AR KPIs.

Data Analyst, HighRadius Corporation Jun 2022 - Dec 2023

- **Analysed Order-to-Cash transaction datasets of 100,000+ records using SQL and Excel**, identifying root causes for payment delays that informed process changes across 10+ client accounts.
- Refined matching logic to cleanse remittance data and flag anomalies, **cutting manual effort by 40%**, while using Jira to log issues and track performance trends over time.

PROJECTS

Predictive Analytics for Business Lending (Python, Scikit-learn, Pandas, NumPy, Matplotlib) Nov 2025 - Dec 2025

- **Built and benchmarked six ML classifiers on a 100,000-record, 200-feature dataset**, identifying Logistic Regression as the optimal choice (0.77 recall, 0.85 AUC) for prioritising customer outreach.
- **Resolved severe class imbalance and 40% missingness** through embedded class-weighting, median imputation, and Information Gain-based feature selection across two comparative preprocessing pipelines.

Database Design & Analytics for Wealth Management (MySQL, Power BI, Excel) Jan 2026 - Feb 2026

- Designed and implemented a 14-entity relational database (MySQL) for a wealth management firm, **applied ERD modelling in Chen and Crow's Foot notation** and normalised to 3NF to eliminate update and deletion anomalies.
- **Built SQL-driven revenue and retention dashboards using Power BI**, surfaced a £125K revenue-recovery opportunity from lapsed clients and flagged advisor AUM targets as systematically unrealistic

EDUCATION

MSc Business Analytics, University of Warwick (Warwick Business School), UK Sep 2025 - Sep 2026

KIIT University, BTech, Electronics & Telecommunication Engineering, India Jul 2018 - Jun 2022

ACHIEVEMENTS

WBS x Emirates Group Business Challenge Apr 2026 - Jun 2026

- Led a 4-person team to first place out of 9 competing teams in a live Emirates Group challenge, designed "Runway to Rewards", a gamified Skywards loyalty concept for the Gen Z segment, winning a funded trip to Emirates Dubai HQ.
