

AYAN NAZM

Coventry, UK | M: 07584 379180 | ayan4dreem71@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data analyst with over 3+ years' experience across **SaaS Automation, consulting and analytics**. Combines a strong technical foundation in **analytical tools, enterprise data automation and stakeholder management** with a proven ability to translate complex datasets into clear, commercially useful decisions.

EDUCATION

Warwick Business School, MSc Business Analytics, Coventry, UK Sep 2025 - Sep 2026
KiiT University, B.Tech, Electronics & Telecommunication Engineering, Bhubaneswar, India Jul 2018 - Jun 2022

RELEVANT SKILLS

Functional Competencies: Data Analysis & Validation, Business Process Mapping, Requirements Gathering, ERP & Solution Implementation, UAT & Client Workshops, Customer Segmentation, Stakeholder Management, Business Case Development, Data Visualisation.

Data & Analytics: SQL, Python, R, Power BI, Tableau, Excel.

Platforms & ERP: SAP, Oracle, SharePoint.

Methods: Machine Learning, Deep Learning, CRISP-DM, Clustering & Dimensionality Reduction, Agile.

WORK EXPERIENCE

Segmentation Consultant (Dissertation Project), British Telecom Mar 2026 - July 2026
London, UK

- **Moved BT Business's segmentation approach beyond firmographics to customer needs**, behaviours and decision drivers, analysing a large-scale B2B survey dataset.
- **Developed and tested segmentation models using clustering and dimensionality-reduction techniques using R programming** within a CRISP-DM framework.
- Translated segments into actionable recommendations for marketing, sales and product teams.

Functional Consultant, HighRadius Corporation Jan 2025 - Jul 2025
Hyderabad, India

- Achieved **90%+ auto-match accuracy by leading end-to-end Cash Application implementations** that automated invoice-to-payment reconciliation on their ERP for enterprise clients.
- Cut process downtime **30% by using SQL for performance monitoring, data validation and reconciliation-error tracking**.
- Drove system adoption by owning **UAT execution and running client-readiness workshops**.

Associate Data Analyst, HighRadius Corporation Jul 2022 - Dec 2024
Hyderabad, India

- Lifted invoice-clearing by **25% with customised Cash Application solutions integrated into client ERPs**.
- Optimised invoice matching logic using Python to cleanse remittance data and flag anomalies.
- **Reduced manual effort 40%** by collaborating with technical and client teams to design tailored automation workflows.

PROJECTS & RESEARCH

Predictive Analytics for Business Lending: A CRISP-DM Case Study April 2026 - Aug 2026

- **Built and benchmarked six ML classifiers on a 100,000-record, 200-feature customer dataset** predict business credit application likelihood.
- **Addressed severe class imbalance and 40% missingness** through embedded class-weighting, median imputation, and Information Gain-based feature selection across two comparative preprocessing pipelines.

Project Tamkeen: WBS Business Challenge with The Emirates Group Apr 2025 - June 2026

- **Collaborated with the Emirates Group on a live business challenge**, led a 4-person winning team and earning a funded trip to Dubai HQ and working directly with Emirates.
- Designed "Runway to Rewards", a gamified Skywards loyalty concept for Gen Z backed by a stakeholder map and phased rollout plan.

ADDITIONAL EXPERIENCES

Customer Assistant, Marks & Spencer May 2026 - Present

- Delivered accurate, friendly customer service and till operations across high transaction volumes, resolving queries and discrepancies calmly while working flexibly within a team under pressure during peak trading periods.
